Applicant submits the following in response to the Interview Summary dated January 23, 2005, which was received after the Reply dated January 30, 2005 had been mailed.

STATEMENT OF SUBSTANCE OF TELEPHONIC INTERVIEW OF JANUARY 12, 2006

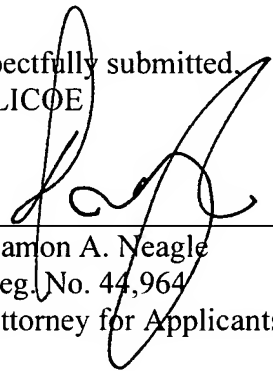

Applicant's representative forwarded to the Examiner discussion drafts of proposed amendments to claim 1 and a proposed new claim 27, as well as additional documentation in support of Applicant's attempt to swear behind U.S. Patent Publication No. US 2004/0207604 A1 to Chuang. Applicant's representative attempted to engage the Examiner in a discussion regarding claim 1 and claim 27, as well as the sufficiency of the additional documentation. The Examiner indicated that he would consider the proposed claims and documentation only when submitted as a formal written response to the pending Office action.

Applicant's representative also attempted to discuss the Examiner's §102(e) rejections of claims 24-26 based on U.S. Patent No. 6,834,199 to Hyun and U.S. Patent No. 6,707,644 to Murphy. Based on Applicant's representative's review of *Hyun* and *Murphy*, there were at least two elements of claim 24 that were clearly not taught by

these references. These features are set forth in the Interview Summary. The Examiner indicated that he would consider these arguments only when submitted as a formal written response to the pending Office action.

Applicant's representative also noted that, as explained on page 2 of the response filed on July 25, 2005, claim 1 incorporates the language of original claim 9 (now canceled), which was determined by the Examiner to be allowable over U.S. Patent Publication No. U.S. 2005/0017953 A1 to Pekka. Yet, in the pending Office action, claim 1 stands rejected under §102(e) as being anticipated by *Pekka*.

Respectfully submitted,
JELLICOE
